Dear Ivo:

I would like to personally thank you and Troy for your support in providing data collection and analysis, troubleshooting, and direction to our company machinists in correcting the vibrations in the rotor of our 4500 hp GE motor on our cycle gas compressor. Your assistance was both timely and professional. Your follow-up field service report was both comprehensive and easy for all to understand.

Once again, I would like to thank you for your assistance. We will definitely be keeping your contact information in our files should future needs occur!

Sincerely,

**Bill Gillette**
