

March 15, 2007

To Whom It May Concern:

Cascade Analytic has been an equipment and service supplier to us for many years now. Their expertise in rotating equipment analysis has been of great benefit to our operation. We have utilized their services to include: Complete vibration systems for our 7 Allison generation sets, field balancing of generators, warranty issues with OEMs on turbines as well as pumps. They have also performed in depth training for our operators and technicians on our CSI equipment which was also supplied by Cascade. Service after the sale has never been an issue.

On a personal note, I have known Mr. Dabelic for over 15 years through several Companies I have worked for, and have always requested his services exclusively. I highly recommend their expertise be utilized in your operations.

If you have any questions, please contact me at michael.ascherl@andespetro.com or 713-870-8158. I will be happy to speak with you.

Sincerely;
Michael Ascherl
