

Ramgen Power Systems, Inc.
11808 Northup Way, Suite W-190
Bellevue, WA, U.S.A. 98005

April 26, 2007

To Whom It May Concern:

Cascade Analytic provided instrumentation, data acquisition, software and, most importantly, expertise in monitoring and troubleshooting our compressor.

Their extensive knowledge of machine vibration and behavior proved invaluable in tracking down and eliminating trouble spots. Particularly helpful was the fast response - we were able to upload data to their server and review with Cascade immediately when issues arose.

We are very happy with the service and support.

A handwritten signature in black ink, appearing to read 'Joe Williams', is positioned above the typed name.
